**Subject: Finance Accelerator**

To whom it may concern:

To put in simply - business process, reporting, training, compliance and customer experience has never been at a level that it is now. Finance Accelerator (Op2ma) has made this all possible.

From the implementation stage I started to get a feel of how Op2ma would affect our operational environment, but until you start using the product with customers the impact is even greater. Our paperwork has decreased, our ability to track staff/sales performance has increased and there are no more spreadsheets! Before Op2ma, our time was mostly dedicated to manual processes, we now are at the stage where we are looking at ways to grow our business. Op2ma has allowed us to do this.

From a support perspective, I cannot speak highly enough of the team at Fusion. Professional, easy to deal with and always willing to assist.

I would recommend Fusion to any company looking to automate their operational environment.

Regards, Paul Antoniou
